

Model

# AQUA SINGLE

The **Aqua Single** model produces crystal-clear, healthy, and mineral-rich water solely through the pressure of the water supply system and a mechanical pump. This model requires no electricity and is intended for household use. Thanks to a carefully designed 6-stage filtration system, the user receives the highest water quality, additionally enriched with essential minerals for health.

The **Aqua Single** is equipped with an 8-liter storage tank for storing purified water. When the stainless steel faucet is opened, filtered water is dispensed from this tank. After each water draw, the tank is automatically refilled.

The **Aqua Single** delivers approximately 190 liters of water per day and is the smallest unit in the Aqua series by DreamFilters.

### Features:

<b>Liters per minute:</b>	up to 190L
<b>Permeate to concentrate ratio:</b>	approx. 1 : 4
<b>Filtration efficiency</b>	up to 99,99%
<b>Direct Flow Plus</b> <small>(filtered water without waiting)</small>	No
<b>Push Notification</b>	No
<b>REFIL stainless steel filter</b> <small>(reusable modules)</small>	No
<b>Adapt System</b> <small>(Integration with home appliances)</small>	No
<b>UV germ barrier</b>	No
<b>SMS Push Notification</b>	No
<b>Touch Display</b>	No
<b>Change interval</b>	6 and 12 months

### Technical specification:

<b>Dimensions</b> <small>Length x Width x Height:</small>	420 X 240 X 390 mm
<b>Weight:</b>	16,5Kg
<b>Recommended operating pressure</b>	3,5-4,5 Bar
<b>Minimum operating pressure</b>	3 Bar

### Type of filtration:

<b>Macrofiltration</b>	Ja
<b>Microfiltration</b>	Ja
<b>Ultrafiltration</b>	Ja
<b>Reverse osmosis</b>	Ja
<b>Water remineralization</b>	ja
<b>Water energizing</b>	No
<b>Water revitalization through water spinning</b>	Ja
