

Model

PearlMax 5

PearlMax 5 is a high-performance, free-standing water dispenser that delivers chilled still, medium or sparkling water.

The water dispenser is designed for all small and medium-sized businesses. It is ideal for offices, restaurants, hotels and fitness centers. This model's capacity is rated for up to 100 people, which means you'll likely never have to wait for chilled sparkling water.

High-quality equipment guarantees hygienic water intake thanks to a nano-coated spout. The housing of this device is made of stainless steel with a satin look, finished with a black mirror plate that blends perfectly into any room design.

Of course, you have the option of using a suitable base cabinet for storing other required components, such as e.g. B. a CO2 bottle.

***Great to know:** The **PearlMax 5** is compatible with the **Aqua Business** water filter, which means that the machine can be supplied with crystal-clear water. The **PearlMax 5** can also be operated with tap water, but we strongly advise against this option. We believe that drinking water only makes sense if the water is properly treated and also protects the components of the water dispenser, which prolongs the life of the system.

Thanks to this solution you can enjoy clean, healthy, chilled and sparkling water!

Technical specifications:

Water options:	chilled carbonated, medium carbonated and still table water
Dispensing/ pump performance:	approx. 120 liters
Cooling capacity: <small>in l/h, continuously at a delta T of 6°C (14 to 8°C)</small>	37 liters
Refrigeration Compressor:	3,8 ccm
Cooling performance continuously	220 kcal
Noise level	approx. 50 dBa
control d. cooling	Mechanical thermostat
Cooling coils material type:	stainless steel
Number of cooling coils:	1
Cooling coil length	approx. 8 m
Inner diameter of the cooling coil	7 mm
Maximum outside temperature	32°C

Dimensions PearlMax 5 <small>Length x Width x Height:</small>	537 X 327 X 443 mm
Dimensions base cabinet <small>Length x Width x Height:</small>	581 X 410 X 910 mm
Weight:	25 Kg
Shipping weight	27 Kg
Recommended CO₂ Pressure	3,5-4,5 Bar
Min. inlet water pressure	2,5 Bar
Max. inlet water pressure	4 Bar
Voltage	230V 50-60Hz
Power consumption	240W
Power connection:	2 m cable with euro plug
Low energy consumption	0,12 kWh per day
Integrated AquaStop function in case of leaks	Yes

*Cooling capacities and dispensing capacities at 24°C ambient temperature, water inlet temperature of 14°C and beverage outlet temperature of 8°C
