

AQUA FLOW DUO

Pre-filtration system

Description:

The Aqua Flow Duo is specifically engineered for preliminary water filtration in tight spaces, making it ideal for various applications such as kitchen sinks or water purification in office buildings.

Its polypropylene spun pre-filter efficiently captures mechanical impurities larger than 1 micron.

Following this, the water undergoes filtration using specialized fibrous activated carbon for ion exchange, effectively removing lead from plumbing systems while enhancing the water's color, odor, and taste.

Finally, ultrafiltration technology ensures the removal of contaminants like bacteria and viruses, effectively blocking particles larger than 0.1 micron.

Technical data:

Dimensions: 195mm x 75mm x 338 mm

Weight: 1075 gram

Filter media: 1 x Sediment filter 1 micron, 1 x UF membrane + silver Activated carbon

Connection: 2 x 3/8 Inch Quick fitting

Water supply connection: 3/8 Inch Adaptor or 3/4 inch Adaptor (Optional)

Maximum water flow: 6 liters / minute

Changing interval: 12 months

Cartridge material: Polypropylene

Cartridge type: Quick change cartridges (without tools)

Installation type: Standing or suspended

Business location:
Pietka Factory GbR
Schönefelder Dorfstraße 1b
14547 Beelitz OT Schönefeld
Germany
USt-IdNr.: **DE343072143**

CEO:
Wojciech Pietka
